Meital Cohen

Meital is a hard-working, relentless developer with a keen eye for design and quirks. She's amongst our top JS developers and has proven herself as a creative, invaluable member of our team. Meital is a front end engineer who has built full-scale platforms single handedly before joining Startup Booster why we are positive she'll grow even stronger.

Recent Projects

Flash-point platform

2021

- A platform that allows you to consolidate everything a student needs during their learning period, which includes chat correspondence with students and practitioners, video calls to give lessons or get help, recorded lessons (courses), and a feed where new updates and videos will be posted.
- The app is built on Vue and Quasar with Vuex.
- The DB is Firestore with Google Cloud, and serverless for server-side functions.
- The app gives thousands of schedule users and supports high skill.
- Work in a team of 6 programmers with proper management of Tasks using the Scrum method at JIRA and managing code through BitBucket at GIT.
- I did a lot of work on the server side of the project and built the entire back-end array of courses.

"Get-sweet" Application

2021

- I have built a system whose function is to offer the user dessert recipes according to the income of the ingredients he has in the kitchen, thus making it easier to choose the user.
- The Front-End development is in Vue and Quasar with Vuex. Server side I developed in Nodejs and ExpressJs based on layering/data
- Logic/ Router with Data Base Firebase Realtime Database and supports High scale. Work with proper Scrum task management at JIRA and code management through GIT at GitHub.
